Table 1. Training-path and broadcast accuracy (%)

Training path	Broadcast	CIFAR10		MNLI		QQP	
		Final	Last 10	Final	Last 10	Final	Last 10
RBLA	RBLA	16.97	17.84	56.81	56.93	75.66	75.99
RBLA	RBLA+	35.49	38.45	42.60	42.56	70.13	69.83
RBLA+	RBLA	**72.96**	**72.84**	58.04	58.14	**76.64**	77.07
RBLA+	RBLA+	72.73	72.76	**60.53**	**62.59**	75.27	**77.25**

Accuracy (%), unweighted mean over ten client broadcast models. Final: update 101 (logged round 100). Last 10: mean of updates 92-101 (logged rounds 91-100). One seed (42), correct rank assignment, Dirichlet alpha=0.4. Cross-broadcast evaluation does not change the training path. RBLA+ includes bidirectional RankScale. Bold marks the highest value in each dataset/metric column. Last 10 is a temporal mean, not an average over seeds. Full-width server-model accuracy is excluded.
